The flow rate increases 100-fold (one hundred-fold) Would be a more idiomatic way of saying this, however, the questioner asks specifically about the original phrasing. The above Ngram

Yes, the correct usage is that 100% increase is the same as a two-fold increase. The reason is that when using percentages we are referring to the difference between the final amount

People often say that percentages greater than 100 make no sense because you can't have more than all of something. This is simply silly and mathematically ignorant. A percentage is just a ratio

Product Description Container-type energy base station: It is a large-scale outdoor base station, which is used in scenarios such as communication base stations, smart cities, transportation, ...

LZY offers large, compact, transportable, and rapidly deployable solar storage containers for reliable energy anywhere.

You miss 100 percent of the shots you don't take. 1991 Burton W. Kanter, "AARP--Asset Accumulation, Retention and Protection," Taxes 69: 717: "Wayne Gretzky, relating the comment of one of his early

relating to 100 years : marking or beginning a century, with the example "the centurial years 1600 and 1700". But there is a word that is widely used to indicate the range of years or

2 Use 100% when you are stating mathematical thought like statistics. Use "one hundred percent" when you are stating non-mathematical thought like a story.

The storage containers utilize innovative solar energy storage technology, such as Lithium-ion batteries, to store excess solar energy generated during the day for use when needed, especially during power

And the usage always seems to involve a number between 100 and 200: "a buck fifty" and so forth
