MIT engineers developed a membrane that filters the components of crude oil by their molecular size, an advance that could dramatically reduce the amount of energy needed for crude oil

The enclosures reduce eye injuries and other hazards associated with laser welding by containing the laser's high energy. The design of a Laser Welding enclosure prioritizes safety and

A look at how AI can be used to help support the clean energy transition by helping to manage power grid operations, plan infrastructure investments, guide the development of novel

Geothermal energy, a clean, continuous energy source accessible in many locations, has been slow to catch on. Nearly 2,000 years ago, the Romans made extensive use of geothermal

Discover how the TruLaser Station 7000 is transforming energy storage R& D with precision laser welding for next-gen battery and hydrogen cell innovation.

LaserStar Technologies designs and manufactures high-performance laser welding, marking, and cutting systems for industrial, jewelry, medical, and more.

At the MIT Energy Initiative's Annual Research Conference, industry leaders agreed collaboration is key to advancing critical technologies amidst a changing energy landscape.

New research emphasizes the importance of well-validated models and forecasting tools in evaluating choices for investments in clean energy technologies and policies by governments and

Investigators in the MIT Energy Initiative and the MIT Plasma Science and Fusion Center have found that -- depending on its future cost and performance -- fusion energy has the potential

An enclosure provides a controlled and isolated environment for the laser welding process, minimizing the risk of exposure to laser radiation, hazardous fumes
