Focusing on the joint R& D and market promotion of containerized charging stations, Sino Energy officially signed the "Joint Development and Framework Cooperation Agreement" with a high

MIT engineers developed a membrane that filters the components of crude oil by their molecular size, an advance that could dramatically reduce the amount of energy needed for crude oil

MIT News explores the environmental and sustainability implications of generative AI technologies and applications.

Investigators in the MIT Energy Initiative and the MIT Plasma Science and Fusion Center have found that -- depending on its future cost and performance -- fusion energy has the potential

The establishment of an integrated charging station with PV, energy storage and battery swapping not only meets the different charging and replacement needs of

To address the growing load management challenges posed by the widespread adoption of electric vehicles, this paper proposes a novel energy collaboration framework integrating Community Energy

Integrated PV and energy storage charging stations, as one of the most promising charging facilities, combine PV systems, ESSs, and EV

MIT engineers created a carbon-cement supercapacitor that can store large amounts of energy. Made of just cement, water, and carbon black, the device could form the basis for

MIT Energy Initiative researchers calculated the economic and environmental impact of future ammonia energy production and trade pathways.

Massachusetts Clean Energy Center CEO MBA '12 Emily Reichert highlights the state government's unique approach to fostering and keeping clean energy innovation.
