At the MIT Energy Initiative's Annual Research Conference, industry leaders agreed collaboration is key to advancing critical technologies amidst a changing energy landscape.

MIT News explores the environmental and sustainability implications of generative AI technologies and applications.

New research emphasizes the importance of well-validated models and forecasting tools in evaluating choices for investments in clean energy technologies and policies by governments and

Geothermal energy, a clean, continuous energy source accessible in many locations, has been slow to catch on. Nearly 2,000 years ago, the Romans made extensive use of geothermal

We are a full-service integrated engineer-procure-construct (EPC) contractor, deploying our vertical, in-house team to execute the engineering, environmental, procurement and direct-hire construction of

We engineer energy storage systems compatible with all battery manufacturers and PCS suppliers. Our tech-agnostic approach guarantees grid resilience and 24/7 readiness.

MIT engineers developed a membrane that filters the components of crude oil by their molecular size, an advance that could dramatically reduce the amount of energy needed for crude oil

As MIT's first vice president for energy and climate, Evelyn Wang is working to broaden MIT's research portfolio, scale up existing innovations, seek new breakthroughs, and channel

We focus on projects of 200 MWdc and above, delivering end-to-end solutions -- from custom engineering and strategic procurement to self-performed construction and rigorous commissioning.

As virtual power plants and vehicle-to-grid integration reshape the industry, tomorrow's EPC contractors might be managing AI-driven storage networks across continents.
