---

The meaning of FLUID is having particles that easily move and change their relative position without a separation of the mass and that easily yield to pressure : capable of flowing.

The solar battery equipment cabinets are made specifically for the solar industry with an aim to make installations safer and easier for consumers. Tailored to fit your specific needs, available in different

fluid adjective (LIKELY TO CHANGE) If situations, ideas, or plans are fluid, they are not fixed and are likely to change, often repeatedly and unexpectedly:

Section Summary A fluid is a state of matter that yields to sideways or shearing forces. Liquids and gases are both fluids. Fluid statics is the physics of stationary fluids.

The SunWize Power UPS Cabinets are targeted for battery backup system applications. These white powder-coated aluminum enclosures feature hinged, key lockable doors with dust covers on locks

Unbound Solar carries durable solar battery boxes and enclosures that are perfect for your off-grid or grid-tie with battery backup system. Browse today.

Fluid definition: A continuous, amorphous substance whose molecules move freely past one another and that has the tendency to assume the shape of its container; a liquid or gas.

FLUID definition: a substance, as a liquid or gas, that is capable of flowing and that changes its shape at a steady rate when acted upon by a force tending to change its shape. See examples of fluid used in

A situation that is fluid is unstable and is likely to change often. The situation is extremely fluid and it can be changing from day to day.

Learn what a fluid is in physics and other sciences. Get the definition and see examples of fluids in everyday life.
