From small off-grid cabins, to peak rate TOU (time-of-use) offset, family homes in suburbia, and small commercial projects, the HomeGrid

Our battery systems store electricity from solar, the grid, or a generator, then automatically powers your home when you need it--at night, during outages, or throughout the day to save money on energy bills.

From small off-grid cabins, to peak rate TOU (time-of-use) offset, family homes in suburbia, and small commercial projects, the HomeGrid Stack'd Series battery is the proven best choice. For colder

Designed with a modular, stackable architecture, this system empowers users to customize their energy storage capacity to meet their specific needs, ensuring optimal performance

Stackable energy storage systems are revolutionizing the way households manage their energy needs. By combining multiple lithium-ion battery units into a unified storage solution, these

Ideal for homeowners, installers, and importers seeking a cost-effective yet scalable residential energy storage solution, with full OEM/ODM customization on capacity, BMS configuration, and exterior design.

The advantages of stacked battery technology are clear, offering a superior solution for residential energy storage. From customized scalability and space-saving efficiency to enhanced durability and

Elephant Power's home energy storage systems offer flexible, secure solutions with capacities from 3.5 to 19.2 kWh. Featuring stackable designs, advanced

Stacked household energy storage systems are redefining what residential power backup and solar self-consumption can look like. With modular expansion, small installation footprints, and increasing

Discover the HomeGrid Stack'd Series, a modular and scalable storage solution for residential and commercial solar applications. With high capacity, a 10-year warranty, and 14.4kW
