With a 400MW solar PV system and 1.3GWh of storage, this game-changing initiative, led by Red Sea Global, is set to power a premier hospitality

Saudi Arabia's Red Sea Project will feature the world's largest photovoltaic-energy storage microgrid with a 400MW solar PV system and

Saudi Arabia's Red Sea Project will feature the world's largest photovoltaic-energy storage microgrid with a 400MW solar PV system and 1.3GWh storage capacity.

Huawei has announced the completion of the world's largest microgrid power station, marking a significant milestone in renewable energy

With a 400MW solar PV system and 1.3GWh of storage, this game-changing initiative, led by Red Sea Global, is set to power a premier hospitality destination along the southwestern coast

Huawei has developed the world's largest microgrid power station which delivers 1 billion kWh power supply per year. The new solution will play a significant role in Saudi Arabia's Red Sea

Huawei's world's largest micro-grid energy storage project is under construction in Saudi Arabia. This project is a cross-border integration of Huawei's smart technology with photovoltaic and energy

Covering 100 km of grid infrastructure, it is the world's first independent microgrid project to be fully powered by solar and energy storage without connection to any power network.
