---

For the examples below - in order to show multiple types of rules for the new column - we will assume a DataFrame with columns "red", "green" and "blue", containing floating-point values ranging 0 to 1.

Note I previously suggested blank instead of `_blank` because, if used, it'll open a new tab and then use the same tab if the link is clicked again. However, this is only because, as GolezTrol

You probably tried to import a new input system package for multiple input devices compatibility. These type of errors are due to conflict between old and new input system packages

Ah, but new experts will rise up and embrace the new, friendly Stack Overflow that they have always wanted. And maybe rediscover the same things the bitter, hateful old guard found.

The next generation of sustainable energy technology might be built from some low-tech materials: rocks and the sun. Using a new approach known

This study not only offers valuable technical support for the construction of photovoltaic power plants in desert gravel areas but also holds

The report examines emerging PV technologies like perovskite, organic, and quantum-dot PV materials, with a primary focus on perovskites, one of the fastest-developing and most

Estimates the energy production and cost of energy of grid-connected photovoltaic (PV) energy systems throughout the world. It allows homeowners, small building owners, installers and manufacturers to

You should use `new` when you wish an object to remain in existence until you delete it. If you do not use `new` then the object will be destroyed when it goes out of scope.

Materials science has also played a crucial role in advancing solar PV technologies. The emergence of new materials such as perovskite solar
