JSON (JavaScript Object Notation) is a lightweight format that is used for data interchanging. It is based on a subset of JavaScript language (the way objects are built in JavaScript). As stated in the MDN,

356 A JSON string must be double-quoted, according to the specs, so you don't need to escape ". If you have to use special character in your JSON string, you can escape it using character. See this list

A modern, user-friendly WordPress plugin designed to promote solar energy, calculate the potential

Photovoltaics (PV) is the conversion of light into electricity using semiconducting materials that exhibit the photovoltaic effect, a phenomenon studied in physics, photochemistry, and electrochemistry. The

Our cutting-edge research focuses on boosting solar cell conversion efficiencies; lowering the cost of solar cells, modules, and systems; and improving the reliability of PV components and

Solar design software helps solar professionals plan, model, and optimize photovoltaic (PV) systems before installation begins. At a basic level,

Photovoltaic systems work by utilizing solar cells to convert sunlight into electricity. These solar cells are made up of semiconductor materials, such as silicon, that absorb photons from

A free online tool to easily create, customize, and export professional solar power system diagrams. Drag and drop components, connect lines, and save your work.

Our solar panel layout tool and PV design software make it easy for you to plan and optimize your solar panel installation. With advanced features and a user

What is a solar photovoltaic (PV) system? A solar PV system is a technology that converts sunlight directly into electricity using the photovoltaic effect.
