A photovoltaic (PV) cell, commonly called a solar cell, is a nonmechanical device that converts sunlight directly into electricity. Some PV cells can convert artificial light into electricity. Sunlight is composed

Are you planning to install a solar photovoltaic (PV) system on your property? The installation of solar PV is regulated by the Zoning Ordinance and requires approval of a building permit.

Learn more about testing and certification options for photovoltaic lighting and ANSI/CAN/UL 8801, the Standard for Photovoltaic Luminaire Systems.

This information bulletin explains the submittal and permitting process and the associated fees for the installation of Solar Photovoltaic (PV) Systems.

The standard test conditions, or STC of a photovoltaic solar panel is used by a manufacturer as a way to define the electrical performance and

The project team provides leadership and technical assistance in partnering with industry experts for accelerating revisions to these foundational codes and

Photovoltaic technology lets you generate electricity from a renewable source: the sun. Unlike traditional methods of electricity generation, which often rely on fossil fuels, photovoltaics...

The conversion of sunlight, made up of particles called photons, into electrical energy by a solar cell is called the "photovoltaic effect"; - hence why we refer to solar cells as "photovoltaic", or PV

Key standards include IEC 61215 for module performance, IEC 61730 for safety testing, and IEC 62446 for system documentation and commissioning tests. The

Photovoltaic (PV) technologies - more commonly known as solar panels - generate power using devices that absorb energy from sunlight and convert it into electrical energy through semiconducting
