"California is moving faster than ever before to build the clean energy we need, now with the world's largest solar and battery project," said California

The U.S. energy storage industry installed a record-shattering 57.6 GWh of new capacity in 2025, the largest year of new additions on record.

California just flipped the switch on the world's largest single-site solar and battery storage project. The Edwards Sanborn project, a groundbreaking solar and battery storage facility, is now

These massive solar plus storage facilities are helping California move away from fossil fuels by delivering solar energy during evening hours and improving grid reliability.

These massive solar plus storage facilities are helping California move away from fossil fuels by delivering solar energy during evening hours and

One of the US's largest solar + battery storage projects is now fully online in Mojave, California.

The Edwards & Sanborn solar-plus-storage project in California is now fully online, with 875MWdc of solar PV and 3,287MWh of battery energy storage system (BESS) capacity, the world's

Latest news on energy storage projects, BESS, capacity expansion, and regulatory updates across Europe, US & Canada, Latin America, and Asia Pacific. Discover how energy

The Edwards & Sanborn solar-plus-storage project in California is now fully online, with 875MWdc of solar PV and 3,287MWh of battery energy

Terra-Gen and Mortenson have announced the activation of the Edwards & Sanborn Solar + Energy Storage project, the largest solar-plus-storage project in the United States. Mortenson...
