The use of clean energy and renewable energy resources--such as solar, wind

If you have DID, you may find yourself doing things you wouldn't normally do, such as speeding, reckless driving, or stealing money from your employer or friend.

Dissociative identity disorder (DID) is a mental health condition where you have two or more separate personalities that control your behavior at different times.

The history of renewable energy dates back to the early 20th century, with the first person to harness solar energy being William Robert Grove in 1839.

The DSM-5 criteria for dissociative identity disorder (DID) center around multiple personalities, amnesia as well as three other DID criteria. Learn more.

To document the history of renewable energy sources from primitive use to the 21st century, we have created an infographic that tracks the timeline

While we often think of renewable energy as a modern phenomenon, its story actually began thousands of years ago. Early human societies harnessed natural resources for energy long before the term

DID is complex--but with the right knowledge, clinicians, caregivers, and communities can play a meaningful role in healing. This on-demand session clarifies DID's clinical realities, reduces

Dissociative identity disorder (DID) is a mental health condition where an individual holds numerous distinct identities, often referred to as "alters." Previously labeled multiple personality

Dissociative identity disorder (DID), formerly known as multiple personality disorder, is a condition that involves the presence of two or more distinct identities.
