Weather radar, wind and waves forecast for kites, surfers, paragliders, pilots, sailors and anyone else. Worldwide animated weather map, with easy to use layers and precise spot forecast.

Windy provides real-time wind maps and weather forecasts with animated worldwide coverage and precise spot predictions.

The coupling of hydrogen energy and wind power generation will effectively solve the problem of energy surplus. In this study, a simulation model of a wind-hydrogen coupled energy

Rio de Janeiro weather forecast. Meteogram, airgram, wind, clouds, temperature, humidity and dew point forecast. ECMWF, WRF, GFS, NAM, NEMS and other forecast models.

Windy provides real-time wind maps and accurate weather forecasts with user-friendly layers and precise spot forecasts.

This framework includes a new open-source electrolyzer simulator to model hydrogen production, degradation, and LCOH based on experimental data and industry input, which is coupled with an

Combining wind energy and hydrogen energy to form a wind hydrogen complementary system can be well connected to the grid. In this paper, wind turbine model, basic electrolytic cell model, proton

Get forecast for specified coordinates Obtain data for wind, temperature, precipitation, air quality and other 20 parameters.

Worldwide animated weather map with layers, precise forecasts, METAR, TAF, NOTAMs for airports, SYNOP codes from stations and buoys, and forecast models.

By analyzing the working principle of wind-hydrogen coupled power generation system and key equipment, the wind power generation model, basic electrolyzer model, compressor
