Are you interested in learning about the different types of wind turbines? From vertical-axis to onshore and offshore, we'll cover them all.

There are two primary types of wind turbines used in implementation of wind energy systems: horizontal-axis wind turbines (HAWTs) and vertical-axis wind turbines (VAWTs).

Explore 12 common types of wind turbines used in renewable energy production, detailing their unique designs and applications.

Horizontal Axis Wind Turbine Or Hawt Vertical Axis Wind Turbine Or Vawt Different Types of VAWTs Other Turbine Designs There are two main designs of VAWT, called Savonius and Darrieus. These designs are quite different in the way they capture the wind energy.
